

facebook campaign pack

everything you need to run the "know before you go" campaign in meta ads manager · 12 ready-made ads, all landing on the home page, copy included, tracking built in.

WHAT THIS CAMPAIGN DOES

- **one simple goal:** get skiers and boarders onto feelzlike.com. every ad lands on the home page · visitors pick their own country and mountains from there, so the same ads work for nsw, victoria and new zealand alike.
- **a range of messages:** 12 ads across four themes (powder alerts · conditions · snow towns · brand). the tracking tag on each link tells you which message pulled people in · double down on the winners.
- australia and new zealand are in peak season right now · this is the moment to spend. a japan-planning follow-up campaign makes sense august to october, when aussies book their japan trips.

SETUP · STEP BY STEP

1. go to **business.facebook.com** → all tools → **ads manager** → create.
2. objective: choose **traffic** → **manual traffic campaign**. name the campaign **winter26-launch**.
3. create **two ad sets, one per country**: name them **australia** and **new zealand**. same ads in both · meta reports results per country automatically.
4. **audience · australia**: location australia (nsw, vic, act to start) · age 21 to 60 · detailed targeting interests: skiing, snowboarding, ski resort.
5. **audience · new zealand**: location new zealand (whole country · it's small enough) · same ages and interests.
6. **placements**: leave on advantage+ placements. this includes instagram automatically · your facebook page is the ad identity, so you do not need an instagram account for ads.
7. **budget**: start at 10 to 15 dollars a day per ad set. run 7 days, then switch off the weakest ads and put the money behind the best two or three.
8. **ads**: start with the six marked **starting six** in the sheet below (a spread across the themes) in each ad set · add the rest later if you want more variety. for each ad: upload the matching square tile, then copy the primary text, headline, description, button and **the exact website url**. the url carries the tracking tags.

reading results: meta shows clicks per ad and per country. google analytics shows what people did after · reports → acquisition → traffic acquisition, look for source "facebook", campaign "winter26-launch" · the "content" tag tells you which message won. the number that matters most: verified powder-alert subscribers.

honest copy rails: "free powder alerts" is true through 31 december 2026 (launch promo) · revisit ad copy before 2027. feelzlike is not in the app stores · never say "download the app", say "add to home screen · works like an app". don't promise live lift status in ads.

THE 12 ADS · COPY AND LINKS

Does it **feelzlike**
it's snowing?
know before you go
