

facebook campaign pack

everything you need to run the "know before you go" campaign in meta ads manager · 12 ready-made ads, copy included, tracking built in.

WHAT THIS CAMPAIGN DOES

- **goal 1 · grow the email list:** the powder-alert ad drives free signups (ad set 1). every verified subscriber is yours to email.
- **goal 2 · make feelzlike the daily habit:** the conditions ads (ad set 2) catch people mid-season when they check weather and roads anyway.
- australia and new zealand are in peak season right now · this is the moment to spend. a japan-planning follow-up campaign makes sense august to october, when aussies book their japan trips.

SETUP · STEP BY STEP

1. go to **business.facebook.com** → all tools → **ads manager** → create.
2. objective: choose **traffic** (simplest and right for this goal).
3. create **three ad sets** using the groupings in this pack: powder alerts · conditions · snow towns. (ad set 4, brand, is optional · run it later at low budget for reach.)
4. **audience** for each: location australia (nsw, vic, act to start) · age 21 to 60 · detailed targeting interests: skiing, snowboarding, ski resort. duplicate the ad set for new zealand when ready.
5. **placements:** leave on advantage+ placements. this includes instagram automatically · your facebook page is the ad identity, so you do not need an instagram account for ads.
6. **budget:** start at 10 to 15 dollars a day per ad set. run 7 days, then switch off the weakest ads and put the money behind the best two or three.
7. for each ad: upload the matching square tile, then copy the primary text, headline, description, button and **the exact website url** from the sheet below. the url carries the tracking tags.

reading results: meta shows clicks. google analytics shows what people did after · reports → acquisition → traffic acquisition, look for source "facebook", campaign "winter26-launch". the number that matters most: verified powder-alert subscribers.

honest copy rails: "free powder alerts" is true through 31 december 2026 (launch promo) · revisit ad copy before 2027. feelzlike is not in the app stores · never say "download the app", say "add to home screen · works like an app". don't promise live lift status in ads.

THE 12 ADS · COPY AND LINKS

Does it **feelzlike**
it's snowing?
know before you go
