

Replit task — close the AU, NZ & US state gaps

Paste this into Replit as a task/prompt for the agent working on the feelzlike app.

Objective

Add the missing ski resorts/regions listed below to feelzlike, following the exact same data pattern already used for the 204 regions currently live (base town page + mountain page, Open-Meteo weather source, elevation, official site link, live conditions card, 48h/5-day forecast). Do not change the existing schema — just extend the region registry the same way the last USA/Canada/Japan expansion did.

Do this in the order given below — don't try to do all ~90 resorts in one pass. Confirm each phase builds and deploys before moving to the next.

Important — commit and push every phase to GitHub as you go (small commits per state/country is fine). The last update was deployed straight from Replit without any commits landing in the repo, so there's currently no way to review or roll back what changed. Please don't repeat that — push to a feature branch and open a PR like the USA build did.

Phase 1 — Australia (3 resorts, 1 new region)

Add to the existing Australia country data:

- **Mt Baw Baw** — Gippsland, Victoria (add to the existing Victoria/High Country region)
- **Mount Mawson** — Mt Field National Park, Tasmania (add to the existing Tasmania region)
- **Corin Forest Alpine Resort** — Canberra (Paddys River) — this is a brand-new region: Australian Capital Territory. Create it as its own region the same way a new state/province gets added elsewhere in the app.

Do NOT add Mount Buffalo (Porepunkah/Bright, VIC) — confirmed closed, no lifts operating since 2006–2008.

Phase 2 — New Zealand (12 resorts, 2 new regions)

Add to the existing New Zealand country data, grouped by region:

Canterbury club fields (add to/create a Canterbury region near the existing South Island regions): Craigieburn Valley, Broken River, Mt Olympus (Windwhistle), Temple Basin (Arthur's Pass), Porters, Mt Cheeseman, Mt Lyford (Waiau), Hanmer Springs Ski Area

Mackenzie/South Canterbury: Mt Dobson (Fairlie), Fox Peak (Fairlie), Roundhill (Lake Tekapo), Ōhau (Twizel)

Other existing regions: Rainbow (Nelson Lakes/St Arnaud), Awakino (Waitaki/Kurow), Snow Farm/Waiorau + Invincible Snowfields (add to the existing Wanaka/Queenstown region), Tukino (add to the existing Ruapehu region — third club field alongside Whakapapa/Turoa)

Two brand-new regions:

- Taranaki — Manganui (Stratford, Mt Taranaki)
- Auckland — Snowplanet (Silverdale) — note this is an indoor snow dome, not a natural mountain; flag it as such in the copy if the schema supports a facility type/note field

Do NOT add: Mt Robert (absorbed into Rainbow in 2003), Snow Park NZ (closed, sold 2013), Mt Potts/Erewhon (heli-ski only, backcountry).

Phase 3 — Michigan (26 resorts remaining)

Add to the existing Michigan state data (Alpine Valley was already added in the last update — don't duplicate it):

Crystal Mountain Resort & Spa (Thompsonville), Caberfae Peaks (Cadillac), Shanty Creek Resorts (Bellaire), Big Powderhorn Mountain Resort (Bessemer), Snowriver Mountain Resort (Wakefield/Bessemer), Ski Brule (Iron River), Marquette Mountain (Marquette), Pine Mountain Resort (Iron Mountain), Norway Mountain Ski and Snowboard Resort (Norway), Porcupine Mountains Ski Area (Silver City), Mont Ripley Ski Resort (Houghton), The Homestead (Glen Arbor), Treetops Resort (Gaylord), Otsego Club & Resort (Gaylord), Mt. Holly Ski and Snowboard Resort (Holly), Mt. Brighton Ski Resort (Brighton), Pine Knob Ski Resort (Clarkston), Mt. Zion Ski Area (Ironwood), Bittersweet Ski Resort (Otsego), Cannonsburg Ski Area (Cannonsburg), Timber Ridge Ski Area (Gobles), Swiss Valley Ski and Snowboard Area (Jones), Snow Snake Ski & Golf (Harrison), Hickory Hills/Mt. Holiday (Traverse City), Mt. McSaubia Recreation Area (Charlevoix), Petoskey Winter Sports Park (Petoskey)

Confirmed closed, do NOT add: Sugar Loaf (Cedar/Traverse City) — closed 2000, demolished 2021.

Phase 4 — New York (19 resorts remaining)

Add to the existing New York state data (Bristol Mountain was already added — don't duplicate it):

Holiday Valley (Ellicottville), HoliMont (Ellicottville, private club), Greek Peak Mountain Resort (Virgil/Cortland), Kissing Bridge (Glenwood/Colden), Titus Mountain Family Ski Center (Malone), Snow Ridge Ski Resort (Turin), Plattekill Mountain (Roxbury), West Mountain Ski Area (Queensbury/Glens Falls), Catamount Ski Area (Hillsdale, NY/MA border), Labrador Mountain (Truxton), Peek'n Peak Resort (Clymer), Song Mountain (Tully), Swain Resort (Swain), Toggenburg Mountain (Fabius), Willard Mountain (Greenwich), McCauley Mountain (Old Forge), Thunder Ridge Ski Area (Patterson), Mt. Peter Ski Area (Warwick/Greenwood Lake), Holiday Mountain (Monticello)

Do NOT add Big Tupper Ski Area (Tupper Lake) — closed since 1999, sold in 2024 with reopening intent but still not operating.

Phase 5 — Pennsylvania (15 resorts remaining)

Add to the existing Pennsylvania state data (Bear Creek Mountain Resort was already added — don't duplicate it):

Jack Frost Big Boulder (Blakeslee), Elk Mountain (Union Dale), Montage Mountain Ski Resort (Scranton), Whitetail Ski Resort (Mercersburg), Liberty Mountain Resort (Carroll Valley), Hidden Valley Four Seasons Resort (Hidden Valley), Laurel Mountain Ski Resort (Ligonier), Ski Roundtop (Lewisberry), Tussey Mountain Ski Area (State College), Ski Big Bear (Lackawaxen), Ski Sawmill (Morris), Spring Mountain (Schwenksville), Boyce Park (Pittsburgh/Plum), Ski Denton (Coudersport), Mountain View at Edinboro (Edinboro)

Phase 6 — Wisconsin (15 resorts remaining)

Add to the existing Wisconsin state data (Alpine Valley Resort was already added — don't duplicate it):

Whitecap Mountains Resort (Upson/Montreal), Devils Head Resort (Baraboo), Wilmot Mountain (Wilmot), Christmas Mountain Village (Wisconsin Dells), Trollhaugen (Dresser), Tyrol Basin (Mount Horeb), Mt. Ashwabay (Bayfield), Mt. La Crosse (La Crosse), Sunburst Ski Area (Kewaskum), The Mountain Top at Grand Geneva Resort (Lake Geneva), Little Switzerland Ski Area (Slinger), Nordic Mountain (Mount Morris), Christie Mountain (Bruce), Bruce Mound Winter Sports Area (Merrillan), Mont Du Lac Resort (Superior)

Phase 7 — Minnesota (12 resorts remaining)

Add to the existing Minnesota state data (Afton Alps was already added — don't duplicate it):

Spirit Mountain (Duluth), Giants Ridge (Biwabik), Welch Village (Welch), Buck Hill (Burnsville), Wild Mountain (Taylors Falls), Mount Kato (Mankato), Andes Tower Hills (Kensington/Alexandria), Coffee Mill Ski Area (Wabasha), Hyland Ski and Snowboard Area (Bloomington), Powder Ridge (Kimball), Detroit Mountain (Detroit Lakes), Buena Vista Ski Area (Bemidji)

Data to source for every resort

For each entry, look up and populate the same fields the existing 204 regions use:

- Official resort site URL (for the "official site" link and as the elevation/base-elevation source)
- Base elevation
- Nearest town/base name (for the base-town page)
- Coordinates (for the map pins, same as existing entries)

Use Open-Meteo as the weather source, matching every existing mountain page — no new weather API needed.

After each phase, verify

1. The country/state region counts on `/countries` go up by the right number (Australia 3→6, New Zealand 4→16, then Michigan/NY/PA/WI/MN counts as each phase lands).
2. Spot-check 2–3 new mountain pages actually show live temperature/forecast data, not just the "town weather is not currently published" placeholder.
3. Run whatever the existing `typecheck/test/build` commands are before pushing (the project already has `pnpm typecheck / pnpm test` scripts — run those, don't skip validation).
4. Push the branch and confirm the commit shows up in GitHub — that's the step that got missed last time.
